GENERAL NOTES

1. Section looking west, cut on the line marked A–A on the floor plans: through the south glazing, the lift shaft, the protected lobby, the stair and the light court.

2. The light court is open to sky for the full height of the building and is the daylight and stack ventilation source for the centre of the plan, where the boundaries are blind.

3. The lift shaft is built full height with removable infill slabs at each level, shown dashed, so a lift can be installed later without cutting structure. Pit and overrun are indicative and to be confirmed against the chosen lift.

4. Flat slab on the column grid, 300 mm structural zone, giving 3.00 m clear at every level and 3.30 m floor to floor.

5. Foundations are shown indicatively only and are subject to a ground investigation and the engineer's design.
