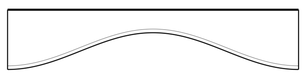
THE BALCONY CURVE IN PLAN — IT CANNOT SHOW IN ELEVATION

1.95 m DEEPEST · 0.75 m SHALLOWEST · 12.8 m² A FLOOR



GRAPHIC SCALE 1:100

0 2 4 m

SOUTH ELEVATION — SCHEME A “WAVE”

LEVEL street frontage · 1:50 @ A1 · METRES

KEY

- Masonry wall cut by section — 200 mm partition, 300 mm external / party
- Internal stud or block partition, 120 mm
- Terrace parapet, 250 mm × 1100 mm high
- Single leaf door, swing shown to opening side
- Glazed opening — arched head where noted
- Element above the cut plane (pergola, slab over)
- Void / open to sky
- ▽ +0.00 Finished floor level datum

SCHEME A — WAVE

WALLS	warm limestone render
SLAB NOSING	rounded, 180 mm
COVE LIGHT	in the underside of the nosing
BALUSTRADE	clear glass, 120 mm inboard
FRAMES	bronze anodised
BALCONY CURVE	serpentine
PROJECTION	1.95 / 0.75 m
BALCONY AREA	12.8 m² a floor
TOP OF BUILDING	+17.05

GENERAL NOTES

1. Preliminary — the exterior only. The plans, site plan and section are agreed at P14 and nothing here changes them: same five levels, same 9.50 × 13.50 m footprint, same 1.00 m setbacks, same openings. Only the skin differs between the two schemes.

2. Every opening drawn here is read from the plan it belongs to rather than redrawn, and checks.py fails the build if an elevation ever shows one the plan does not have.

3. Scheme A takes its material from the contemporary reference: warm limestone render, a rounded slab nosing with a cove light tucked into its underside, clear glass balustrades and planting along the balcony edge. The four south bays read as glazed ribbons between the slabs.

4. The balcony curve is a serpentine — one full period across the frontage, 1.95 m deep at each end drawn in to 0.75 m at the waist. At the waist it is a planting ledge rather than somewhere to stand; the deep ends carry the furniture.

5. That shape costs area: 12.8 m² a floor against the 17.4 m² of the curve drawn today, so 18 m² over the four balcony levels. Adopting it re-issues A-000 and A-101 to A-104, which carry the balcony in plan.

6. The balconies do not wrap the corner as the reference does: the 1.00 m setbacks forbid anything projecting west, north or east, so the cantilever stays on the street frontage.
