GENERAL NOTES

1. Final draft — layout agreed. The living floor: a living area and three sleeping rooms. The living area is 32.3 m² with the stair standing in it and the pantry open along the spine, opening through a sliding door onto the cantilever.

2. The pantry is a counter against the solid stretch of spine, not the walled room the third floor has. The lobby has no wall to the living area either: the spine is opened 3.69 m between the columns at y 8.46 and 12.56, so over that length it is a downstand beam rather than a wall.

3. The west strip is otherwise the third floor's and the east strip the second's, so the wet rooms sit over their counterparts and the stair lines through. Bedrooms 2 and 3 take the north off the hall; east and north carry ordinary windows, the west louvred ventilation only.

4. The master bedroom's north wall is 1.30 m further north than the suite below it, taking it to 19.6 m²; the shared bath gives up the same depth, at 5.4 m².

5. The south cantilever repeats the third floor's: the same asymmetric curve, 2.00 m west sweeping to 1.50 m east, 17.4 m², with sliding doors from the living area and the master bedroom. The second floor has none, so the two do not yet stack.
