GENERAL NOTES

1. The exterior only. The plans, site plan and section are agreed and re-issued to the adopted curve; nothing here changes the rest of them: same five levels, same 9.50 × 13.50 m footprint, same 1.00 m setbacks, same openings. Only the skin differs between the schemes.

2. Every opening drawn here is read from the plan it belongs to rather than redrawn, and checks.py fails the build if an elevation ever shows one the plan does not have.

3. Scheme A takes its material from the contemporary reference: warm limestone render, a rounded slab nosing with a cove light tucked into its underside, clear glass balustrades and planting along the balcony edge. The four south bays read as glazed ribbons between the slabs.

4. The balcony curve is a serpentine — one full period across the frontage, 1.95 m deep at each end drawn in to 1.35 m at the waist. At 1.35 m is usable the whole way along; the deep ends carry the dining and the furniture.

5. This is the adopted curve, and the plans are drawn to it. It cost area to take: 15.7 m² a floor against the 17.4 m² of the curve it replaced, 7 m² over the four balcony levels. A-000 and A-100 to A-104 are re-issued to it.

6. The balconies do not wrap the corner as the reference does: the 1.00 m setbacks forbid anything projecting west, north or east, so the cantilever stays on the street frontage.
