## GENERAL NOTES

1. Final draft — layout agreed. The living floor: a living area and three sleeping rooms. The living area is 32.3 m² with the stair standing in it and the pantry open along the spine, opening through a sliding door onto the cantilever.

2. The pantry is a counter against the solid stretch of spine, not the walled room the third floor has. The lobby has no wall either: the spine is opened 3.69 m between the columns, a downstand beam rather than a wall.

3. The west strip is otherwise the third floor's and the east strip the second's, so the wet rooms stack and the stair lines through. East and north carry ordinary windows, the west louvred ventilation only. The hall to the north bedrooms stops at its last door; the dead end beyond goes to bedroom 2, 16.4 m².

4. The master bedroom's north wall is 1.30 m further north than the suite below it, taking it to 19.6 m²; the shared bath gives up the same depth, at 5.4 m².

5. The south cantilever repeats the third floor's: the same asymmetric curve, 2.00 m west sweeping to 1.50 m east, 17.4 m², with sliding doors from the living area and the master bedroom. The second floor has none, so the two do not yet stack.
