
RETAINING & BOUNDARY WALLS

LEVEL -0.50 to +0.00 · 1:75 @ A1 · METRES

KEY

- External / party wall cut by section, 300 mm — brick, colour unrestricted
- Internal partition, 100 mm — red brick
- Terrace parapet, 250 mm × 1100 mm high
- Single leaf door, swing shown to opening side
- Glazed opening — arched head where noted
- Element above the cut plane (pergola, slab over)
- Void / open to sky
- ▽ +0.00 Finished floor level datum

THE FRAME

STREET WALL	9.10 m
STREET WALL HEIGHT	1.20 m, indicative
GATE	2.40 m
GARDEN LEVEL	-0.50
VILLA LEVEL	+0.00
GROUND RETAINED	0.50 m
WALL DESIGN	by the engineer
BOUNDARY LINE	by SUR-001
PARAPET	250 mm, brick, rendered both faces
PARAPET DUTY	guard at 1.10 m

GENERAL NOTES

1. Layout only. No member size, no slab or footing depth, no reinforcement and no load appears on this sheet or anywhere in the STR series. Those are the structural engineer's, and a column schedule with sizes invented by an architect is worse than none, because somebody builds it.

2. The grid, the column coordinates, the spans and the slab edges are measured from the same geometry the architecture is drawn from and are exact.

3. The parapet is 250 mm and the client has specified it: brick, rendered both faces. That names what it is made of and nothing more. Since P32 it is also the guard to every terrace and to the penthouse roof, standing 1.10 m, which is a structural duty rather than a material one: whether 250 mm of brick carries a guard load cantilevering off a slab, and whether it has to be reinforced or become concrete, is the engineer's.

4. The garden sits 0.50 m below the villa, so the change in level is retained somewhere along the west face and around the forecourt. Where is drawn; how is not.

5. The street wall's height is the client's choice and indicative at 1.20 m; its line awaits the measured survey. Nothing else on this sheet depends on either.

6. Retaining design, drainage behind the wall, movement joints and foundations are the engineer's and wait on GEO-001.

FIVE-STOREY VACATION VILLA — EZBIT ABU RUKBAH, QUESNA, MENOUFIA, EGYPT

DRAWING

RETAINING & BOUNDARY WALLS

DRAWING No	REVISION	SCALE	DATE
STR-400	**P33**	**1:75 @ A1**	**2026-10-13**

Layout for the engineer's design — no member sizes, no reinforcement, no loads. Not for construction.
Do not scale; work to figured dimensions only.

REVISIONS

P30 2026-10-12 site corrected to Ezbit Abu Rukbah; Code 305 named as the fire code
P31 2026-10-12 ground parameters recorded on GEO-002; water table given as 2.50 m
P32 2026-10-13 roof access: ladder to +16.45, guard at 1.10, top now +17.55
P33 2026-10-13 parapet specified brick; the penthouse guard enters the bill
