GENERAL NOTES

1. One two-bedroom apartment. The party wall can only be opened between y 3.80 and 7.18 — north of that it backs onto the stair, lobby and riser — so the living, dining and kitchen run right across that band as one 10.60 m wide room, and it is the only link between the two blocks.

2. The south terrace therefore sits on the 1.20 m cantilever, the full width of the building, under a pergola. The north terrace is in block B, shaded by the boundary wall and carrying the plant behind a screen.

3. Bedroom 1 and its ensuite take block B with openable east windows above +3.00. Bedroom 2 is in block A at the light court. No room is entered through another: the family bath, the WC, the store and bedroom 2 all open off the hall or its passage.

4. Terrace finish is 30 mm below floor level, falling 1:80 to outlets. Parapets are 250 mm thick and 1.10 m high.

5. The roof over this floor falls 1:60 to outlets at the parapet, waterproofing turned up 150 mm minimum; the light court is carried up through it, open to sky. The 1.2 m² vent shown over the landing smoke-vents the protected stair, which has no external wall of its own.
