GENERAL NOTES

1. Enlarged from A-100. The kitchen is reduced 30 % on the client's instruction; the area released carries a staff WC, an internal bin store and a servery on the route in, so bins no longer stand out on the patio.

2. Kitchen fit-out: a wet run on the west wall with a deep bowl sink and undercounter refrigeration, a cooking line on the north wall under the extract hood, and a free-standing preparation counter between them.

3. Laundry takes one washer-dryer, a utility sink and a folding counter, as instructed. Linen and housekeeping stores are next to it off the same hall.

4. The hall in block B is 1.10 m clear and serves the laundry, the guest bath, the linen store and the guest bedroom, so none of them is entered through another room.

5. Kitchen extract rises in a fire-rated shaft inside the riser cupboard off the fire lobby and discharges above roof level. Suppression over the cooking line; 2 hour separation to the floor over.
