THE RISER

LEVELS SERVED	5
RISER RESERVED	2.50 × 3.50 m
WET ON	5 levels
PLANT	roof, north-west
HEIGHT SERVED	16.45 m
SIZES	by the engineer
CAPACITIES	by the engineer
BELOW GROUND	by the engineer

GENERAL NOTES

1. The stack, level by level, from the tanks to the ground.

2. A diagram, not a drawing to scale, and it fixes one thing: the riser runs the full height of the building in the east strip, where the wet rooms were measured to stack on every level.

3. No size, capacity, rating or load appears. The engineer's design fills them in; this reserves the space it has to fit through.

4. The connection below ground waits on GEO-001 and the drainage design, and on whatever the authority requires at the boundary.
