GENERAL NOTES

1. The index is built, not listed: every row is a sheet this project can actually draw, with the title and revision that sheet carries. An index typed beside the drawings goes wrong within a revision or two, and it is the one document a reader trusts when deciding a drawing does not exist.

2. Rows in grey are built but outside the issue: the A-300 enlargements, which are of apartments the villa no longer has, and the scheme B and C elevations, which the client did not choose.

3. The prefix is part of the number. A-402 is the street elevation and ARC-402 the second floor's ceiling plan.

4. Deliverables beyond the drawings — the structural, services and quantities packages — are registered on ARC-000 with their status.

5. Not for construction. Issued for the owner's record, costing and construction information.
