
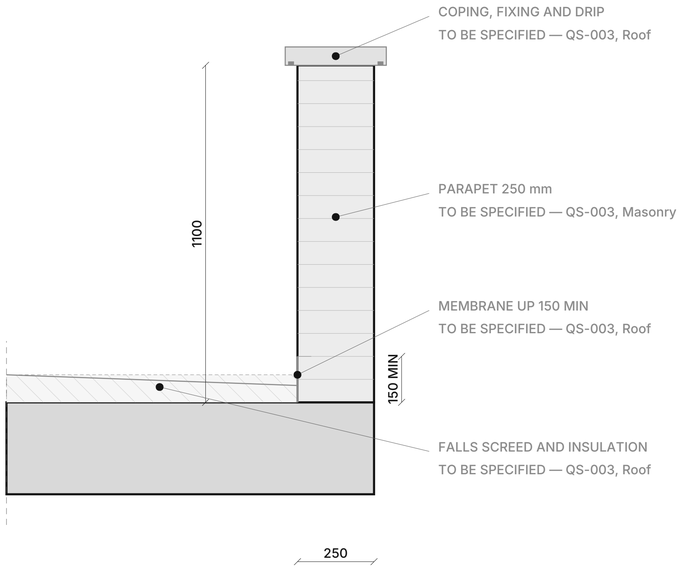
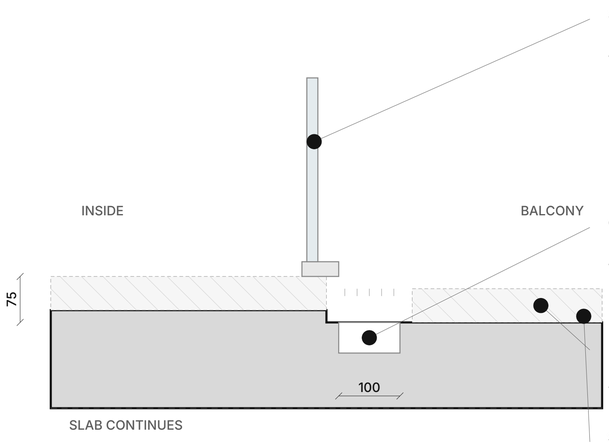
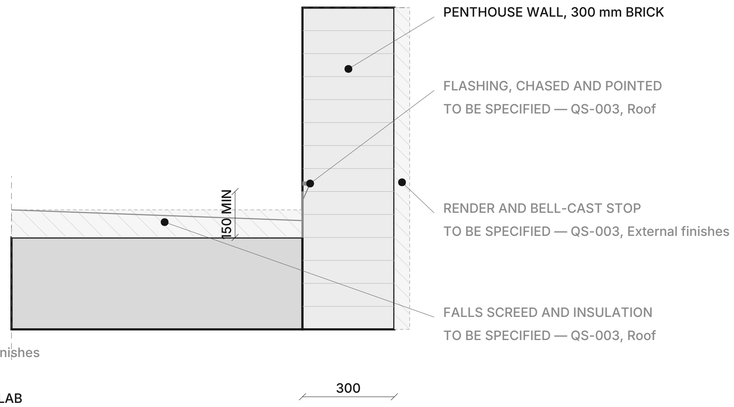
D1 BALCONY SLAB EDGE, NOSING AND COVE
1:10



D2 TERRACE PARAPET AND COPING
1:10



D3 THRESHOLD ONTO THE BALCONY
1:5



D4 ROOF UPSTAND AT THE PENTHOUSE WALL
1:10

CONSTRUCTION DETAILS

TYPICAL JUNCTIONS · 1:5 AND 1:10 · MILLIMETRES

FIGURED FROM THE GEOMETRY

EXTERNAL / PARTY WALL	300 mm
INTERNAL PARTITION	100 mm
PARAPET	250 mm × 1100 high
STRUCTURAL ZONE	300 mm
CLEAR HEIGHT	3.00 m
SLAB NOSING	180 mm
COVE LIGHT	50 × 50 mm
BALUSTRADE	1100 mm high
GLASS SET IN FROM THE EDGE	120 mm

GENERAL NOTES

1. Layout only, and in a stricter sense than the rest of the set: every figured dimension here is this project's and exact, and everything hatched is a build-up nobody has specified yet. The hatched zones are drawn at a plausible thickness so the junction can be read; none of those thicknesses is a specification.

2. Each hatched zone names the QS-003 topic that has to answer for it. Until that topic is answered the detail cannot be built, priced or warranted, and no quantity is taken from this sheet.

3. The 300 mm structural zone is ours because it sets the floor-to-floor; how much of it is slab, and what is in the slab, is the engineer's. No reinforcement, cover or grade appears here.

4. Thermal performance, waterproofing warranty, movement and buildability are the specifier's. The drawing shows where things meet, not that the meeting works.

5. D1 is the junction the whole frontage depends on, and it is the one carrying a 2.00 m cantilever: read it with STR-500.

FIVE-STOREY VACATION VILLA — EZBIT ABU RUKBAH, QUESNA, MENOUFIA, EGYPT

DRAWING

CONSTRUCTION DETAILS

DRAWING No	REVISION	SCALE	DATE
ARC-600	**P30**	**1:5 / 1:10 @ A1**	**2026-10-12**

Preliminary design issue — not for construction.
Do not scale; work to figured dimensions only.

REVISIONS
P27 2026-10-11 the stair, which the interior cutaways did not show at all
P28 2026-10-11 ARC-400 centred: the last sheet still on the old wide origin
P29 2026-10-11 STR-200: the column schedule it was named for; heights corrected
P30 2026-10-12 site corrected to Ezbit Abu Rukbah; Code 305 named as the fire code
