## GENERAL NOTES

1. The front terrace and the master balcony are enclosed by a 1.10 m high parapet pierced by traditional arched brick openings; arch heads are shown dashed.

2. Terrace finish is 30 mm below internal floor level, falling 1:80 to outlets at the parapet.

3. The master suite occupies block B with the bedroom on the garden side; the dressing room is daylit from the light court.

4. East boundary openings: the adjoining plot is limited to 3.00 m in height, so the east wall is opened above that level. The master bedroom cross ventilates between the balcony and its east window, and the ensuite and linen store are naturally ventilated.

5. Openings in a boundary wall are subject to local fire separation and rights of light rules; confirm before construction.

6. All bedroom doors give 900 mm clear opening, and the landing holds a 1.10 m clear route to the stair.
